HELP TO EASILY RAISE FUNDS with eFundraising

You want to raise funds or involve investors in your project? It is a long, regulated and expensive process, especially after the closing since it leads to the constitution of a base of more than 10 investors. The time spent on their management (regulated communication, transactions, payments, reporting, UBO type administration, governance, legal acts, ...) is too high and leads to a significant cost.

Spreads now offers its eFundraising platform to ambitious projects to enable them to manage their investors efficiently, flexibly and securely, regardless of their number or type (crowd, local community, customers, employees, business angels, FFF, ...) and this for half the traditional costs!

Get in touch with our specialist (andrea@spreads.com) to discuss your goals and the details of the proposed deal, before signing a contract with us. **In a few days, you can be starting using Spreads to raise funds!**

What do we offer?

1. We transform the information destined to investors in a **regulatory compliant document** and make sure that the information process of the investors is correctly handled.
2. We give you an **easy way to direct investors** to said information.
3. We give **access to 45k+ investors**.
4. We offer the **transactional infrastructure and services, handling all KYC (Know Your Customer) and transactional operations** of the investors, including payments.
5. We offer the investors **pooling infrastructure and services** and therefore:
 - Prepare, review and sign all the necessary documentation for the notary closing for the investors;
 - Manage the investors during the entire duration of the investment (general assemblies, payments, preferential rights, etc).

Who is eFundraising for?

1. **Start-up and scale-ups** that are in need of **seed or early-stage money** quickly to carry their vision and to **increase their company's exposure**
2. **Green energy projects** who want to let certain investors (local community, clients, employees, ...) participate in their project.

Why use eFundraising?

Increased success rate

Increase chances to get funded thanks to an easy access to the fundraising information and to a network of 45,000 investors.

Investor pooling

Make sure you have the right pooling vehicle* set up for your investors, from the very start, to avoid heavy administrative and legal burdens or worse, deal breakers with institutional investors in the future.

Secure and compliant fundraising

Make sure the fundraising marketing, subscription process, closing and investors management is done in full compliance with applicable laws.

Who is Spreads?

Since 2011, Spreads has been providing their three digital services to over 400 international companies and associations in order to help them manage more than 35,000 stakeholders.

With **eFundraising** and **ePooling**, companies can reduce the cost of fundraising and investor management by a factor of 3, thanks to a digital pooling process and vehicle.

With **eGovernance**, international associations and companies with over 100 members or shareholders can organize their general meetings easily and in a legally valid manner, while taking five times less time (and therefore cost) than before.

Our clients

With more than **400 clients** managed and over **35,000 users**, Spreds has established itself as a leader in the digital management of stakeholders. Spreds has seen strong annual growth in all 3 of its products.

eFundraising	ePooling	eGovernance	Overall
